Sir:

SUPPLEMENTAL RESPONSE

Responsive to the interview with the Examiner on May 7, 2008, please consider the following remarks.

THOMPSON et al.
Application No. 09/589,200
May 8, 2008

REMARKS/ARGUMENTS

Reconsideration and allowance of this application are respectfully requested.

Currently, claims 1-29 are pending in this application.

The Examiner is thanked for extending the courtesy of an interview with Applicant's representative on May 7, 2008.

Page 2, lines 15-21 of the originally-filed specification states the following:

Processes can be of different types. A computer process, in particular a computer program is compiled and run as logical instructions to be translated and acted on by a machine. Other processes are instantiated as physical systems involving people. In particular, there are inputs and outputs to allow decision making, optimisation and customisation by users which will affect the process as performed to produce for instance local, individual and/or time based variations. It is these other processes which ASOPE is particularly adapted to generate and support.

As discussed during the interview, the specification (including the above-reproduced section of the specification) identifies corresponding structure for enabling the "means" limitations required by independent apparatus claim 10 and its dependents.

Conclusion:

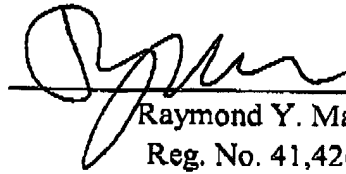

Applicant believes that this entire application is in condition for allowance and respectfully requests a notice to this effect. If the Examiner has any questions or believes that an interview would further prosecution of this application, the Examiner is invited to telephone the undersigned.
